

create 10 questions on ionic substances

1. What is an ionic substance?
2. How are ionic substances formed?
3. What is an example of an ionic substance?
4. What properties do ionic substances have?
5. Is ionic bonding involved in ionic substances?
6. What are cations and anions?
7. What is the difference between ionic compounds and molecular molecules?
8. How does the lattice energy of an ionic substance affect its solubility?
9. What is the role of electrolytes in ionic substances?
10. Does the shape of an ionic substance affect its properties?
