

Create tasks for primary 5 on the digestive system and preventable causes of liver disease

Task 1: Create a poster about the digestive system and how it works.

Task 2: Identify the main organs of the digestive system including the pancreas, small intestine, stomach, gallbladder, and large intestine.

Task 3: Create a chart identifying the functions of each of these organs in the digestive system.

Task 4: Research common preventable causes of liver disease, such as alcohol consumption, unhealthy diet, lack of exercise, and certain medication.

Task 5: Create a summary discussing ways to prevent liver disease, emphasizing the importance of a healthy lifestyle, regular exercise, and a balanced diet.

Task 6: Create an educational video to teach others about the digestive system and how to prevent liver disease.
