

Generate a list of questions to ask during a lesson observation to analyse the effectiveness of different teaching strategies in a high school math class

1. What strategies have you been using to engage students during the lesson?
2. How have you been assessing student understanding?
3. To what extent have you been able to differentiate instruction to meet the needs of all learners within the class?
4. Are students taking an active role in their learning, or do they appear to be more passive?
5. How have you been tracking student progress throughout the lesson?
6. How have you been using technology to enhance student learning during the lesson?
7. Are there any strategies for increasing student motivation within the classroom?
8. How have you been offering support to students who may need extra help?
9. Are there any activities that you have found to be particularly successful in helping students learn the material?
10. What changes have you noticed in students' attitudes and engagement levels during the lesson?
