

Write a sample grade 9 essay of 300 words arguing why it is better to live in a town.

Currently, many people live in either towns or cities. While cities are often more crowded, bustling, and full of many different kinds of opportunities, towns often offer a much more comfortable lifestyle. This essay will explain why it is better to live in a town rather than a city.

Firstly, towns are generally much less crowded than cities. This provides the convenience of being able to drive or walk anywhere without having to wait in long lines of traffic or be surrounded by a crowd of people. This also provides a safer atmosphere as there will likely be fewer criminals in smaller towns.

Furthermore, towns benefit from a lower cost of living than cities. This is partly due to the lower number of people living in the town, but also due to the smaller size of the houses and other properties that can be found. This makes it much easier for people to afford to buy a decent house, giving them a lot more freedom when it comes to their overall financial budget.

Finally, towns may provide more of a sense of community than cities. As the towns are usually smaller, everyone usually knows each other and everyone looks out for one another. This can provide a great feeling of security and connectedness as no one is ever really alone. This also leads to more trust and understanding between the people in the town, which is always a great thing.

In conclusion, living in a town is far better than living in a city. Towns are usually less crowded, benefit from a lower cost of living, and provide a far greater sense of community. These benefits make a town an ideal environment in which to live and raise a family, as it is likely to be much more comfortable and manageable. As such, it is clear that towns are usually the better option when compared to cities.
